Relevant managerial & technical experience

- Identifying business requirements and mapping them to the Oracle Applications across Oracle Financials, SCM and Procurement Modules
- Develop a comprehensive strategy for the implementation of Oracle ERP modules, with a focus on Procurement and Project functionalities.
- Lead the implementation of Oracle Procurement modules, covering strategic sourcing, purchasing, supplier management, and procurement analytics.
- Oversee the implementation of Oracle Project modules, including project planning, cost management, billing, and project analytics, ensuring alignment with project management best practices.
- Integrate Oracle Procurement and Project modules with other relevant ERP modules, ensuring seamless data flow and communication across different functional areas.
- Customize Oracle ERP configurations to align with specific organizational requirements in Procurement and Project management, ensuring the system meets unique business processes.
- Manage relationships with Oracle ERP vendors, staying informed about updates, patches, and new features related to Procurement and Project functionalities.
- Plan and execute data migration strategies for Procurement and Project data, ensuring accurate and timely transfer of information from legacy systems to the Oracle ERP platform.

- Develop and deliver comprehensive training programs for end-users, facilitating smooth adoption of Oracle Procurement and Project modules and ensuring proficiency in system utilization.
- Lead change management initiatives specific to Oracle ERP implementations, addressing resistance and ensuring a positive transition for users adapting to new Procurement and Project processes.
- Ensure that Oracle ERP implementations in Procurement and Project management adhere to regulatory compliance standards, mitigating legal and compliance risks.
- Implement robust security measures and access controls within Oracle ERP, safeguarding sensitive Procurement and Project information from unauthorized access.
- Analyze and optimize Procurement processes within Oracle ERP, ensuring efficiency in strategic sourcing, purchasing, and supplier management.
- Implement effective cost management strategies within Oracle Project modules, ensuring accurate tracking and reporting of project-related expenses.
- Configure Oracle Project modules to support accurate billing processes and revenue recognition, aligning with project accounting standards.
- Collaborate with cross-functional teams, including finance, operations, and project management, to understand organizational needs and align Oracle ERP solutions with strategic objectives.
- Explore and implement mobile ERP solutions specifically for Oracle Procurement and Project modules, enabling users to access critical information and perform tasks on-the-go.
- Integrate Oracle ERP with business intelligence tools, enhancing data analytics and reporting capabilities for informed decision-making in Procurement and Project domains.
